

## **American Transportation Industry Announcement**

In 2010, we entered the American Transportation Industry as a new company marketing under the corporate name of **LCS-Load Covering Solutions Inc.**

However, for the past 32 years, American companies have known us in Canada as **Aero-Kit Industries Inc.**, and now that's about to change. Effective immediately, we are excited to announce the change of our corporate name in Canada to **LCS-Load Covering Solutions Ltd.**, ensuring consistency to our North American customers.

This strategic move has brought many changes to our company with expanded partnerships in new product lines from several innovative companies wanting to expand markets throughout North America.

To complement our own complete line of flatbed load covering systems, new partnerships will allow us to expand into the waste management, aggregate and agricultural industries, with new and innovative solutions for load covering.

We are proud to announce our own line of the highest quality manufactured truck equipment products, including Storage Boxes, Step & Saddle Boxes, DOT Bulkheads, custom made Headache Racks, heavy duty Trailer Ramps & Load Levelers – all marketed under our new trademark **LOAD ARMOUR™**.

We are looking forward to distributing to a diversified network of dealers throughout North America, and we welcome all new inquiries from companies that wish to buy and resell complete systems or aftermarket parts, provide installations, or service.

I invite all transportation fleets, owner operators, dealers and OEMs to learn more about our company by visiting our full product lines as seen on our website. Contact us and find out what's behind our new corporate name, our company philosophy, and why we are a valued choice for the American Transportation Industry when engineering of highly innovative load covering solutions is required.

Respectfully,

**Brian W. Petelka**  
President
