engineered sliding systems

**TRANSFORMED FROM THE 1800'S
LOAD COVERING SOLUTIONS MEETS MODERN DAY TRANSPORTATION TARPING REQUIREMENTS**

flatbed trailers

the **LOOK**® engineered sliding system is a fully modular retractable tarp & aluminum frame system designed to provide load covering versatility on a flatbed trailer with the weather protection of a van trailer. With the ability for one operator to easily slide the tarp system in either

direction along the length of the trailer, loads can be conveniently covered or uncovered in minutes. Built to the North American approved width of 108", all systems are available in standard heights of 84", 88", 92", 96", 100" or customized to lower heights or maximum heights of 13'-6" based on the trailer deck.

Contact the experts at LCS and let us spec out the proper system to meet your load covering requirements.

b-trains flatbed trailers

the **LOOK** engineered sliding system for B-Train trailers is another example of maximizing load covering on specialized equipment. Standard with aluminum bulkheads on both lead & pup trailers, some customers require the pup trailer to have a roll up front flap for specialized loading requirements. An important consideration when ordering a B-Train trailer combination is the **LOOK** systems preferred 39" gap clearance requirement between trailers to optimize the critical turning radius.

truck bodies

the **LOOK** engineered sliding system for truck bodies provides companies with the ability to deliver specialized weather sensitive cargo that typically cannot be loaded in a hard side van body. At the same time, take advantage of promoting your products and services by maximizing you're engineered sliding system as a travelling billboard advertisement. Contact our trained technical sales and

customer service team for more information and let them spec a sliding system for your load covering requirements.

drop deck trailers

the **LOOK** engineered sliding systems for drop deck trailers is rapidly growing in popularity because of the load covering versatility it provides to carriers and shippers. Covering large oversize specialized cargo like machinery, waste water treatment plants, or power generating equipment are all viable with a versatile sliding tarp system.

the **LOOK** comes in three models, Split System at the drop, Single Transition and Dual Transition, allowing full access for loading and unloading on to any deck. The next time your drop deck load covering

requirements demands a safe method of tarping from ground level, call upon the **LOOK** engineered sliding systems

double drops

the **LOOK** engineered sliding tarp system has been challenged many times to provide protective load covering for double drop or extendible drop deck trailers with full success. At LCS we have covered a variety of full size commercial, recreational and military helicopters, airplane fuselages, wings and jet engines, locomotives and city transit buses.

Whatever your specialized load covering requirements are, reference our product by name, and get the **LOOK** !

All the **LOOK** sliding system videos can be viewed on our website

utility trailers & bodies

Load Covering Solutions has taken its product a step further and identified the need to cover the special load requirements for utility trailers. the **LOOK** engineered sliding tarp system has provided weather protection for classic & vintage vehicles, ATV's, snowmobiles, landscape equipment and other sensitive cargo. If a hard side trailer doesn't provide easy access

to tying down your loads, don't manually tarp it, but equip your trailer with the **LOOK**, a common sense solution providing a great value!

boom trucks & tilt'n-load bodies

The demand for specialized load covering systems on Boom Trucks & Tilt'n-Loads is a challenge that the **LOOK** engineered sliding system responds well to. LCS creative design team will tailor the perfect custom system for your load covering requirements. Transportation needs for drywall, machinery, lift trucks, scissor lifts, boom trucks are all new emerging markets that require load covering systems. Protect your load for the future and call the experts, Load Covering Solutions.
