

SLIDE KIT™

Steel Haulers Sliding System

THE WESTERN
WAGON

TRANSFORMED FROM THE 1800'S

LOAD COVERING SOLUTIONS MEETS MODERN DAY TRANSPORTATION TARPING REQUIREMENTS

flatbed trailers

Load Covering SOLUTIONS - LCS Windmaster SLIDEKIT round top rolling tarp system delivers a sleek bullet-like contoured appearance that cuts through the wind and gives drivers the feeling of having no trailer being pulled behind their truck. It is the real-life resemblance of the 1800's WESTERN WAGON which delivered goods across America and now this modern-day version is rapidly populating our interstates. Its dome roof design arching 24" in height avoids any concern of roof damage should your trailer be caught sitting with excessive rains or snow accumulation in comparison to a flat roof design.

"STD" Bulkhead

ADD MIRROR SS WRAP

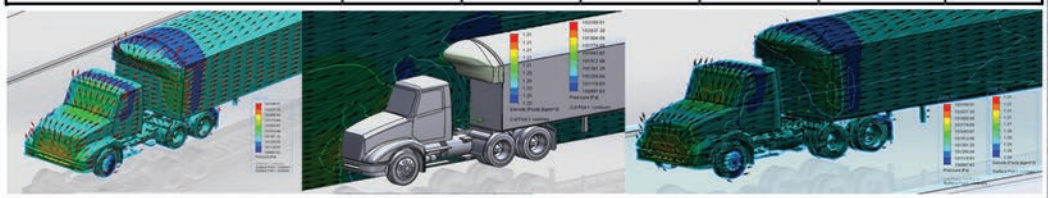

CFD Simulation Analysis

WINDMASTER BULLET SYSTEM vs FLAT BH SS @ 100" Ht.

Wind Drag Reduction (Drag Force Value %)

System Height 100"	Wind Drag Reduction (Drag Force Value %)				Cd (Drag Coefficient) Flow Weighted Average (%)	Improved Fuel Economy (%)
	Head Wind at Yaw Angle 0%	Cross Wind at Yaw Angle 3%	Cross Wind at Yaw Angle 6%	Cross Wind at Yaw Angle 10%		
WindMaster Bullet System vs Flat SS BULKHEAD	15.52%	12.65%	11.87%	9.49%	11.80%	5.90%

It all starts with our LCS Windmaster Aerodynamic tested design in comparison to a 100" high flat bulkhead traveling 65MPH. The CFD testing results has proven a Wind Drag Reduction of 11.8% which equates to a fuel efficiency of 5.9%. As a point of interest, a 72" high flat top system in comparison to a 100" round top was less efficient so don't be fooled when others tell you something different.

Slide Kit is a steel haulers best friend as it transformed from the 1970's side kit which took over from manual tarping with modular post, panels, bows and fitted tarp. If you are hauling 72" diameter coils with the eye to the front or to the side, then our LCS 66" side height with center arch of 24" for an OAL 90" height is your perfect load covering solution. If your coils are higher and your flatbed deck camber allows it then you can extend our system to 76" side height and 100" OAL.

LCS Steel Wheel design and modular car plates simply can't be duplicated with superior design or quality.

You can buy from the Rest or you can buy the BEST from LCS!

drop deck trailers

Drop Deck Slide Kit Systems were developed for those specialized carriers hauling JUMBO COILS. Shippers are demanding larger payloads wrapped in bigger coils and with the LCS-Slide Kit you have the ability to haul 100" coils loaded suicide. Visit us at www.loadcovering.com and see the options available.

truck bodies

Truck Body Slide Kit Systems were developed to provide the local delivery cartage companies and specialized transporters a contoured covering system that provided load covering without having the need for a big square box on the bed of the truck. Slide Kit is perfect for allowing snow and rains to run right off the roof eliminating the damage most commonly experienced with flat top systems.

Flat Arched Bulkhead required for truck bodies and optional for trailers wanting a large door.

utility trailers

Did you know that LCS is heavily invested in expanding the markets for load covering tarp solutions specific to non-semi, goose neck & bumper pull trailers. VISIT www.loadcovering.com and you will be amazed with all the diversified models of systems available for all trailers.

Slide Kit is the true transformation of the 1800's Western Wagon
