HIGH HAULER

106" HT. System - More Aerodynamic than a 100" HT. Sys

Visit Us at Booth # 2229
NORTH AMERICAN COMMERCIAL VEHICLE SHOW
Atlanta
Oct 28-31

The Patented Aerodynamic "Windmaster SMARTLOOK - High Hauler" is the newest model. A 1st in Aerodynamics in a rolling tarp system that can provide 104" Interior load capacity making it perfect for loading Containers on a low deck (55" HT) flatbed trailer.

If your trucking company has lots of money to burn on fuel, driver safety is not important, or the high cost of maintenance is just the price of doing business then the following CFD Aerodynamic Test Results are probably not important to you...

However if they are, then look at these incredible FACTS:

- Wind Drag Results Test at 65 MPH:
 - FACT: Flat Alum BH of 106"HT. vs Flat Alum BH 100"HT - **Increased** Wind Drag (-7.85%)
 - FACT: WMSL BH of 106"HT. vs Flat Alum BH 100" HT - **Decreased** Wind Drag by 3.91%

Windmaster SMARTLOOK provides overall, 11.76% More Aerodynamics

- FACT: WMSL BH of 106"HT. vs Flat Alum BH 106"HT - **Decreased** Wind Drag by 10.21%
- 50% of Wind Drag Reduction = Better Fuel Economy %

Come Learn more about the Best Line up of Windmaster Aerodynamic Rolling Tarp System Models and ask for a list of customers that will confirm the superb road handling results they witnessed immediately.
